

Prior to today's class study the handout "Notes and Studying" and use the recommended procedure for taking today's notes. Then improve those notes as instructed in the handout and bring a photocopy (not the originals) of the improved set to the next class session. Study the last page of the handout so that you know how your notes will be graded (by a classmate).

Before turning in the photocopy of your notes, print out and staple the last page of the Notes Assignment to your notes. Be sure to put your student ID number in the space provided (but not your name, so note can be graded anonymously).
